Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Tejima et al.(4,736,371).

With regards to claim 1, Tejima teaches a method comprising: receiving channel observation information (reservation request received in a reservation slot), computing at least one parameter for distributed control, said at least one parameter for distribution control including at least one distribution parameter(determining slot assignments), and said computing being based at least in part on said channel observation information(determination based on message length) and transmitting said at least one parameter for distributed control (transmit slot allocation to remote stations), wherein said at least one distribution parameter relates to restriction on traffic on traffic over a basic access channel(slot allocation relates to total bandwidth supported by the channel and the number of slot

reservation requests), said restriction based at least in part on message length.(multiple slot allocations to a particular station based on message length)[see Fig.2A, and col. 2 lines 10-26)

Claims 7, 13 are rejected for the same reasons as claim 1 because the central station and remote stations in Tejima are configured to perform the method steps in claim 1.(Fig. 3-5)

With regards to Claims 6, 12, 18 Tejima teaches retransmission parameter by the base station. (retransmit control logic, ACK/NAK, Fig. 2A, Fig. 3@27)

Allowable Subject Matter

Claims 19-26 are allowed.

Claims 2-4, 8-10, 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
